15

The purpose of this directory is to put you in direct contact with those agencies and individuals involved in non-point source pollution.

Those names listed are the technical people who have largely the responsibilities for the development of assessment and Best Management Practices relative to forestry activities.

There is a need for close coordination of the forestry communities with respect to water quality management. Hopefully, this directory will promote an opportunity to exchange information and ideas with those people primarily concerned with non-point source pollution.
